SUMMARY

Detailed-oriented, responsible and committed software developer and UX designer, with a get-it-done, on-time, and high-quality product spirit. Passionate about collaborative work as well as about taking on new problems as technology continues to evolve to meet users' ever growing demands for excellence in user experience. Strong experience with C, C++, Java, JavaScript, Python, and HTML. Some successes using my programming languages and technologies expertise include:

- **Mark the Location:** Led the team that developed this location-based application, which allows users to save current position on the map with gestures or voice commands.
- **Map It Up:** Served a member of the team that developed this interactive emoji-map that allows users to use emoji characters to mark up popular spots on a map.
- **Skinformed:** Served a member of the team that developed this application to bridge the gaps between skincare recommendations, product information and skin detection devices, which allows users to easily create and follow personalized skincare routines.

SKILLS

- **Design:** User Flow, Persona, Storyboarding, Wireframing, Prototyping, Iterating
- **Research:** Interview, Survey, Usability Testing, A/B Testing, Comparative Analysis, Generative & Qualitative Research
- **Programming Languages:** C, C++, Java, Python, SPARC assembly, R, HTML, CSS, JavaScript, Node.js
- **Tools:** Microsoft Office Suite, Adobe Photoshop/Dreamweaver/Illustrator/InDesign, InVision, Eclipse, Visual Studio
